

# Athreyas Yelishetti

Senior Staff Site Reliability Engineer · Zscaler · Bay Area, California

Senior Staff SRE with 15 years in security and infrastructure, from Zscaler's zero-trust platform to customer onboarding and production delivery at Akamai. Moving toward solutions architecture and forward deployment: understanding customer constraints, designing the system, and owning it into production.

## SERVICES

---

### ● ZSCALER

2021-12 → PRESENT

## Senior Staff Site Reliability Engineer

---

4Y 9M · ACTIVE

- Provision and operate the inline zero-trust proxy fleet across **100+ data centers**, on Zscaler-owned Linux and BSD hardware.
- Re-architected provisioning into a self-executing Python init package, now in production, cutting full-cluster setup from **36-40 hours** to **6-8 hours**.
- Build and maintain Python and Ansible automation for remote provisioning and build delivery; add production capacity behind existing customer-facing virtual IPs.

### ● AKAMAI TECHNOLOGIES

2019-06 → 2021-12

## Senior Site Reliability Engineer

---

2Y 6M

- Unblocked stalled customer onboardings, working through application configuration until production.
- Ran multi-region AWS infrastructure for Enterprise Application Access with Terraform, Ansible and Elasticsearch.
- Structured data-path upgrades to avoid customer traffic interruptions, organized management-path rollouts, and added SSO/RBAC to internal tooling and cloud instances.

### ● AKAMAI TECHNOLOGIES

2017-01 → 2019-06

## Escalation Engineer

---

2Y 5M

- Led **25-30 customer onboardings** through production and worked **10+ proofs of concept** end to end.
- Supported **60-80 customers** after onboarding; **10-15 asked for me** on their calls.
- Owned complex Enterprise Application Access escalations through closure, including legacy-app access, SSO with Okta/Ping, desktop clients and browser-based remote desktop.
- Raised customer onboarding requirements that became product features in later releases.

### ● REDCENTRIC PLC

2013-03 → 2015-08

## Senior Application Support Engineer

---

2Y 5M

Managed and supported enterprise applications hosted by clients, traced transaction failures to root cause, and built Nagios monitoring and routine automation.

---

- CITRIX R&D SYSTEMS

2010-06 → 2012-08

## Support Engineer

---

2Y 2M

Developed, tested and published Citrix App Store SSO connectors; configured AD, certificate services and SAML for identity-management products.

---

- SOFTCOM INC

2016-11 → 2016-12

## Operations & Management Engineer

---

CONTRACT · US PATENT AND TRADEMARK OFFICE

Maintained Linux/Windows servers for messaging, image conversion and translation; automated server and backup operations.

---

## SIDE CHANNEL

- HOME LAB

ONGOING · PRIVATE

## Self-hosted infrastructure

Self-hosted infrastructure for testing runtimes, networking and deployment patterns. Built a public status pipeline for the private network: push-only updates, allowlisted labels and fail-closed address filtering.
